SUBJECT INDEX

Adhesion
Adhesion of *Staphylococcus aureus* and *Escherichia coli* to bovine udder epithelial cells . 77
Aspergillus terreus
Humoral immunity in disseminated *Aspergillus terreus* infection in the dog 283
Aujeszky's disease
Studies of transplacental and perinatal infection with two clones of a single Aujeszky's disease (pseudorabies) virus isolate 243
Bactericidal assay
A rapid micro-method for the study of antibody-mediated killing of bacteria, with specific application to infection of sheep with *Pasteurella haemolytica* *263*
Bacteriology
A rapid micro-method for the study of antibody-mediated killing of bacteria, with specific application to infection of sheep with *Pasteurella haemolytica* *263*
Adhesion of *Staphylococcus aureus* and *Escherichia coli* to bovine udder epithelial cells . 77
Colony morphology of *Staphylococcus aureus* in serum-soft agar following in vivo and in vitro growth 87
Comparison of the toxic and antigenic properties of single bovine isolates of *Pasteurella haemolytica* representing five serotypes and an untypable strain 351
Detection of enterotoxigenic *Escherichia voli* in peggeries in Victoria by DNA hybridisation using K88, K99, LT, ST_1 and ST_2 probes 273
Etiological agents of bovine mastitis 41
Immunological cross-reactivity between pseudocapsular antigens of strains of *Staphylococcus aureus* isolated from cases of bovine mastitis 159
Isolation of *Mycoplasma salivarium* from swine 385
Opsonic effect of monoclonal antibodies against *Leptospira interrogans* serovar *copenhageni* 167
Protective effect of glucan against experimentally induced staphylococcal mastitis in ewes 67
The effect of different levels of iron intake on the multiplication of *Mycobacterium paratuberculosis* in C57 and C3H mice 369
Bluetongue
Growth of bluetongue and epizootic haemorrhagic disease of deer viruses in poikilothermic cell systems 15
Studies with enzyme-linked immunosorbent assays for the serodiagnosis of bluetongue and epizootic haemorrhagic disease of deer 323
Temporal development of bluetongue virus protein-specific antibody in sheep following natural infection 231
Bovid herpesvirus-4
Biological and biochemical comparison of bovid herpesvirus-4 strains 339
Bovine cytomegaloviruses
Biological and biochemical comparison of bovid herpesvirus-4 strains 339
Bovine spumavirus
Detection of immunological tolerance to bovine spumavirus (BSV) with evidence for salivary excretion and spread of BSV from the tolerant animal 35
Epidemiological studies of bovine spumavirus 25
Bovine viral diarrhoea
Bovine viral diarrhea virus proteins: heterogeneity of cytopathogenic and non-cytopathogenic strains and evidence of a 53K glycoprotein neutralization epitope 303

Canine adenovirus
Monoclonal antibodies to canine adenoviruses 1 and 2 that are type-specific by virus neutralization and immunofluorescence 1
Cat
Feline panleucopenia – in vivo infectivity studies 137
Latent infection with feline syncytial virus of cell cultures prepared from the kidneys of new-born kittens 9
Virus shedding and immune responses in cats inoculated with cell culture-adapted feline infectious peritonitis virus 145
Cattle
Colony morphology of *Staphylococcus aureus* in serum-soft agar following in vivo and in vitro growth 87
Comparison of the toxic and antigenic properties of single bovine isolates of *Pasteurella haemolytica* representing five serotypes and an untypable strain 351
Detection of immunological tolerance to bovine spumavirus (BSV) with evidence for salivary excretion and spread of BSV from the tolerant animal 35
Epidemiological studies of bovine spumavirus 25
Etiological agents of bovine mastitis 41
Evaluation of an antigen-capture ELISA for the detection of bovine herpesvirus Type 1 shedding from feedlot cattle 101
Identification of major antigenic proteins of bovine herpesvirus 1 and their correlation with virus neutralizing activity 109
Immunological cross-reactivity between pseudocapsular antigens of strains of *Staphylococcus aureus* isolated from cases of bovine mastitis 159
Immunological relationships between malignant catarrhal fever virus (alcelaphine herpesvirus 1) and bovine cytomegalovirus (bovine herpesvirus 3) 211
Biological and biochemical comparison of bovid herpesvirus-4 strains 339
Chicken
Serological response of chickens to oral vaccination with Newcastle disease virus 255
The non-specific stimulation of avian peripheral blood lymphocytes from uninfected chickens by paramyxoviruses and influenza viruses 181
Colony morphology
Colony morphology of *Staphylococcus aureus* in serum-soft agar following in vivo and in vitro growth 87
Control measures
Protective effect of glucan against experimentally induced staphylococcal mastitis in ewes 67
Culture methods
Growth of bluetongue and epizootic haemorrhagic disease of deer viruses in poikilothermic cell systems 15
Cytomegalovirus
Superinfection with porcine cytomegalovirus initiating transplacental infection 189
Deer
Studies with enzyme-linked immunosorbent assays for the serodiagnosis of bluetongue and epizootic haemorrhagic disease of deer 323
Diagnostics
Characterization of biological and antigenic properties of raccoon, dog and blue fox parvoviruses: a monclonal antibody study 219
Detection of enterotoxigenic *Escherichia coli* in piggeries in Victoria by DNA hybridisation using K88, K99, LT, ST_1 and ST_2 probes 273

Evaluation of an antigen-capture ELISA for the detection of bovine herpesvirus Type 1 shedding from feedlot cattle 101
Identification of hog cholera viral isolates by use of monoclonal antibodies to pestiviruses 315
Immunological relationships between malignant catarrhal fever virus (alcelaphine herpesvirus 1) and bovine cytomegalovirus (bovine herpesvirus 3) 211
Isolation of *Mycoplasma salivarium* from swine 385
Latent infection with feline syncytial virus of cell cultures prepared from the kidneys of new-born kittens 9
Routine application of enzyme-linked immunosorbent assay in comparison with complement fixation for the diagnosis of foot-and-mouth and swine vesicular diseases 201
Studies with enzyme-linked immunosorbent assays for the serodiagnosis of bluetongue and epizootic haemorrhagic disease of deer 323

Diarrhoea
Detection of enterotoxigenic *Escherichia coli* in piggeries in Victoria by DNA hybridisation using K88, K99, LT, ST_1 and ST_2 probes 273

Disease transmission
Detection of immunological tolerance to bovine spumavirus (BSV) with evidence for salivary excretion and spread of BSV from the tolerant animal 35
The protective value of vaccine-induced neutralising antibody titres in swine fever 123
Virus shedding and immune responses in cats inoculated with cell culture-adapted feline infectious peritonitis virus 145

Dog
Humoral immunity in disseminated *Aspergillus terreus* infection in the dog 283

Epidemiology
Epidemiological studies of bovine spumavirus 25

Epizootic haemorrhagic disease
Growth of bluetongue and epizootic haemorrhagic disease of deer viruses in poikilothermic cell systems 15
Studies with enzyme-linked immunosorbent assays for the serodiagnosis of bluetongue and epizootic haemorrhagic disease of deer 323

Eschericia coli
Adhesion of *Staphylococcus aureus* and *Escherichia coli* to bovine udder epithelial cells . 77
Detection of enterotoxigenic *Escherichia voli* in piggeries in Victoria by DNA hybridisation using K88, K99, LT, ST_1 and ST_2 probes 273

Feeding and nutrition
The effect of different levels of iron intake on the multiplication of *Mycobacterium paratuberculosis* in C57 and C3H mice 369

Feline infectious perotonitis
Virus shedding and immune responses in cats inoculated with cell culture-adapted feline infectious peritonitis virus 145

Feline syncytial virus
Latent infection with feline syncytial virus of cell cultures prepared from the kidneys of new-born kittens 9

Foot-and-mouth disease
Routine application of enzyme-linked immunosorbent assay in comparison with complement fixation for the diagnosis of foot-and-mouth and swine vesicular diseases 201

Fox
Characterization of biological and antigenic properties of raccoon, dog and blue fox parvoviruses: a monoclonal antibody study 219

Fungi
Etiological agents of bovine mastitis 41
Humoral immunity in disseminated *Aspergillus terreus* infection in the dog 283
Getah virus
Clinical and virological observations on swine experimentally infected with Getah virus . 295
Transplacental infection in mice inoculated with Getah virus 129
Glucan
Protective effect of glucan against experimentally induced staphylococcal mastitis in ewes 67
Herpesvirus
Evaluation of an antigen-capture ELISA for the detection of bovine herpesvirus Type 1 shedding from feedlot cattle 101
Identification of major antigenic proteins of bovine herpesvirus 1 and their correlation with virus neutralizing activity 109
Immunological relationships between malignant catarrhal fever virus (alcelaphine herpesvirus 1) and bovine cytomegalovirus (bovine herpesvirus 3) 211
Hog cholera
Identification of hog cholera viral isolates by use of monoclonal antibodies to pestiviruses 315
Immunology
A rapid micro-method for the study of antibody-mediated killing of bacteria, with specific application to infection of sheep with *Pasteurella haemolytica* *263*
Antigenic variation between three strains of rinderpest virus detected by kinetic neutralisation and competitition ELISA using early rabbit antisera 195
Bovine viral diarrhea virus proteins: heterogeneity of cytopathogenic and non-cytopathogenic strains and evidence of a 53K glycoprotein neutralization epitope 303
Characterization of biological and antigenic properties of raccoon, dog and blue fox parvoviruses: a monoclonal antibody study 219
Comparison of the toxic and antigenic properties of single bovine isolates of *Pasteurella haemolytica* representing five serotypes and an untypable strain 351
Detection of immunological tolerance to bovine spumavirus (BSV) with evidence for salivary excretion and spread of BSV from the tolerant animal 35
Humoral immunity in disseminated *Aspergillus terreus* infection in the dog 283
Identification of hog cholera viral isolates by use of monoclonal antibodies to pestiviruses 315
Immunological cross-reactivity between pseudocapsular antigens of strains of *Staphylococcus aureus* isolated from cases of bovine mastitis 159
Monoclonal antibodies to canine adenoviruses 1 and 2 that are type-specific by virus neutralization and immunofluorescence 1
Opsonic effect of monoclonal antibodies against *Leptospira interrogans* serovar *copenhageni* 167
Studies with enzyme-linked immunosorbent assays for the serodiagnosis of bluetongue and epizootic haemorrhagic disease of deer 323
Temporal development of bluetongue virus protein-specific antibody in sheep following natural infection 231
The non-specific stimulation of avian peripheral blood lymphocytes from uninfected chickens by paramyxoviruses and influenza viruses 181
The protective value of vaccine-induced neutralising antibody titres in swine fever 123
Virus shedding and immune responses in cats inoculated with cell culture-adapted feline infectious peritonitis virus 145

Influenza
The non-specific stimulation of avian peripheral blood lymphocytes from uninfected chickens by paramyxoviruses and influenza viruses 181
Iron
The effect of different levels of iron intake on the multiplication of *Mycobacterium paratuberculosis* in C57 and C3H mice 369
Leptospira interrogans
Opsonic effect of monoclonal antibodies against *Leptospira interrogans* serovar *copenhageni* 167
Malignant catarrhal fever
Immunological relationships between malignant catarrhal fever virus (alcelaphine herpesvirus 1) and bovine cytomegalovirus (bovine herpesvirus 3) 211
Mastitis
Adhesion of *Staphylococcus aureus* and *Escherichia coli* to bovine udder epithelial cells . 77
Colony morphology of *Staphylococcus aureus* in serum-soft agar following in vivo and in vitro growth 87
Etiological agents of bovine mastitis 41
Immunological cross-reactivity between pseudocapsular antigens of strains of *Staphylococcus aureus* isolated from cases of bovine mastitis 159
Protective effect of glucan against experimentally induced staphylococcal mastitis in ewes 67
Mitogens
The non-specific stimulation of avian peripheral blood lymphocytes from uninfected chickens by paramyxoviruses and influenza viruses 181
Mouse
The effect of different levels of iron intake on the multiplication of *Mycobacterium paratuberculosis* in C57 and C3H mice 369
Transplacental infection in mice inoculated with Getah virus 129
Mycobacterium paratuberculosis
The effect of different levels of iron intake on the multiplication of *Mycobacterium paratuberculosis* in C57 and C3H mice 369
Mycoplasma salivarium
Isolation of *Mycoplasma salivarium* from swine 385
Newcastle disease
Serological response of chickens to oral vaccination with Newcastle disease virus 255
Opsonic effect
Opsonic effect of monoclonal antibodies against *Leptospira interrogans* serovar *copenhageni* 167
Panleucopenia
Feline panleucopenia – in vivo infectivity studies 137
Paramyxovirus
The non-specific stimulation of avian peripheral blood lymphocytes from uninfected chickens by paramyxoviruses and influenza viruses 181
Parvovirus
Characterization of biological and antigenic properties of raccoon, dog and blue fox parvoviruses: a monoclonal antibody study 219
Pasteurella haemolytica
A rapid micro-metehod for the study of antibody-mediated killing of bacteria, with specific application to infection of sheep with *Pasteurella haemolytica* 263
Comparison of the toxic and antigenic properties of single bovine isolates of *Pasteurella haemolytica* representing five serotypes and an untypable strain 351

Pathogenicity
Clinical and virological observations on swine experimentally infected with Getah virus 295
The protective value of vaccine-induced neutralising antibody titres in swine fever 123
Perinatal infection
Studies of transplacental and perinatal infection with two clones of a single Aujeszky's disease (pseudorabies) virus isolate 243
Pestivirus
Identification of hog cholera viral isolates by use of monoclonal antibodies to pestiviruses 315
Pig
Clinical and virological observations on swine experimentally infected with Getah virus . 295
Detection of enterotoxigenic *Escherichia coli* in piggeries in Victoria by DNA hybridisation using K88, K99, LT, ST_1 and ST_2 probes 273
Isolation of *Mycoplasma salivarium* from swine 385
Studies of transplacental and perinatal infection with two clones of a single Aujeszky's disease (pseudorabies) virus isolate 243
Superinfection with porcine cytomegalovirus initiating transplacental infection 189
The protective value of vaccine-induced neutralising antibody titres in swine fever 123
Proteins
Bovine viral diarrhea virus proteins: heterogeneity of cytopathogenic and non-cytopathogenic strains and evidence of a 53K glycoprotein neutralization epitope 303
Identification of major antigenic proteins of bovine herpesvirus 1 and their correlation with virus neutralizing activity 109
Raccoon
Characterization of biological and antigenic properties of raccoon, dog and blue fox parvoviruses: a monoclonal antibody study 219
Rinderpest
Antigenic variation between three strains of rinderpest virus detected by kinetic neutralisation and competition ELISA using early rabbit antisera 195
Serology
Biological and biochemical comparison of bovid herpesvirus-4 strains 339
Sheep
A rapid micro-method for the study of antibody-mediated killing of bacteria, with specific application to infection of sheep with *Pasteurella haemolytica* 263
Colony morphology of *Staphylococcus aureus* in serum-soft agar following in vivo and in vitro growth 87
Protective effect of glucan against experimentally induced staphylococcal mastitis in ewes 67
Temporal development of bluetongue virus protein-specific antibody in sheep following natural infection 231
Staphylococcus aureus
Adhesion of *staphylococcus aureus* and *Escherichia coli* to bovine udder epithelial cells .. 77
Colony morphology of *Staphylococcus aureus* in serum-soft agar following in vivo and in vitro growth 87
Immunological cross-reactivity between pseudocapsular antigens of *Staphylococcus aureus* isolated from cases of bovine mastitis 159
Staphylococcus spp.
Protective effect of glucan against experimentally induced staphylococcal mastitis in ewes 67

Swine fever
The protective value of vaccine-induced neutralising antibody titres in swine fever 123
Swine vesicular disease
Routine application of enzyme-linked immunosorbent assay in comparison with complement fixation for the diagnosis of foot-and-mouth and swine vesicular diseases 201
Toxins
Comparison of the toxic and antigenic properties of single bovine isolates of *Pasteurella haemolytica* representing five serotypes and an untypable strain 351
Detection of enterotoxigenic *Escherichia coli* in piggeries in Victoria by DNA hybridisation using K88, K99, LT, ST_1 and ST_2 probes 273
Transplacental infection
Studies of transplacental and perinatal infection with two clones of a single Aujeszky's disease (pseudorabies) virus isolate 243
Superinfection with porcine cytomegalovirus initiating transplacental infection 189
Transplacental infection in mice inoculated with Getah virus 129
Vaccination
Serological response of chickens to oral vaccination with Newcastle disease virus 255
Virology
Antigenic variation between three strains of rinderpest virus detected by kinetic neutralisation and competition ELISA using early rabbit antisera 195
Bovine viral diarrhea virus proteins: heterogeneity of cytopathogenic and non-cytopathogenic strains and evidence of a 53K glycoprotein neutralization epitope 303
Characterization of biological and antigenic properties of raccoon, dog and blue fox parvoviruses: a monoclonal antibody study 219
Clinical and virological observations on swine experimentally infected with Getah virus . 295
Detection of immunological tolerance to bovine spumavirus (BSV) with evidence for salivary excretion and spread of BSV from the tolerant animal 35
Epidemiological studies of bovine spumavirus 25
Evaluation of an antigen-capture ELISA for the detection of bovine herpesvirus Type 1 shedding from feedlot cattle 101
Feline panleucopenia – in vivo infectivity studies 137
Growth of bluetongue and epizootic haemorrhagic disease of deer viruses in poikilothermic cell systems 15
Identification of hog cholera viral isolates by use of monoclonal antibodies to pestiviruses 315
Identification of major antigenic proteins of bovine herpesvirus 1 and their correlation with virus neutralizing activity 109
Immunological relationships between malignant catarrhal fever virus (alcelaphine herpesvirus 1) and bovine cytomegalovirus (bovine herpesvirus 3) 211
Latent infection with feline syncytial virus of cell cultures prepared from the kidneys of new-born kittens 9
Monoclonal antibodies to canine adenoviruses 1 and 2 that are type-specific by virus neutralization and immunofluorescence 1
Routine application of enzyme-linked immunosorbent assay in comparison with complement fixation for the diagnosis of foot-and-mouth and swine vesicular diseases 201
Serological response of chickens to oral vaccination with Newcastle disease virus 255
Studies of transplacental and perinatal infection with two clones of a single Aujeszky's disease (pseudorabies) virus isolate 243
Studies with enzyme-linked immunosorbent assays for the serodiagnosis of bluetongue and epizootic haemorrhagic disease of deer 323
Superinfection with porcine cytomegalovirus initiating transplacental infection 189

Temporal development of bluetongue virus protein-specific antibody in sheep following natural infection 231
The non-specific stimulation of avian peripheral blood lymphocytes from uninfected chickens by paramyxoviruses and influenza viruses 181
The protective value of vaccine-induced neutralising antibody titres in swine fever 123
Transplacental infection in mice inoculated with Getah virus 129
Virus shedding and immune responses in cats inoculated with cell culture-adapted feline infectious peritonitis virus 145

Virulence

Antigenic variation between three strains of rinderpest virus detected by kinetic neutralisation and competition ELISA using early rabbit antisera 195
Feline panleucopenia – in vivo infectivity studies 137

Yeasts

Etiological agents of bovine mastitis 41

Zoonoses

Isolation of *Mycoplasma salivarium* from swine 385
